

DIACOM VOICE

Enterprise Telecoms at a fraction of the price.

Diacom Voice provides a hosted VoIP phone system that is safe, secure, reliable and one that you can depend on with local survivability. Our “local survivability” solutions mean that your phone systems keep on working, even if the Internet is down.

Diacom Voice solutions are cost effective, as there’s no requirement to pay line rental fees, added to this the cost of calling is significantly lower (up to 60%).. Clients who have moved to *Diacom* Voice have seen an increase in efficiency through more advanced technologies being available and the option of people working from home being an easy transition. Our clients have benefited greatly from the fact that all *Diacom* Voice packages come with a soft client which be deployed on a PC, Laptop, Tablet or mobile phone which has afforded them greater flexibility and agility.

We can offer our clients all-inclusive monthly billing packages which include all support costs whether that be remote or on-site support during business hours or 24/7.
